

SPEEDFEST

April 28th and 29th, 2012

Hosted By:

Speedfest is an exciting, high-speed aircraft design competition which is intended to foster enthusiasm for aviation, and unmanned aircraft design. There are two flight classes for 2012:

Alpha Class is the **Advanced** class. There are fewer restrictions, and more challenging performance and missions are required. For 2012, the mission includes a vertical takeoff, a pylon race, and an in-flight banner deployment.

India Class is the **Invitational** class. For 2012, eight high-school teams will compete in a pylon race with a contest-provided kit airplane. Teams are allowed to make limited modifications to the aircraft.

The top 3 teams in each class will be recognized with awards. The winners of each class will be awarded the *Speedfest Cup*.
